Seattle, WA | hjinhao066us@gmail.com | +1 (206) 670-7564 | linkedin.com/in/jinhao-hu-uw

AI systems builder for LLM workflows, business automation and evaluation

## CORE SKILLS

---

**AI Tools:** Claude Code, Codex, Dify, MCP

**AI Methods:** LLM-as-judge evaluation, retrieval-augmented agents (keyword search)

**Data & Tools:** Python (pandas, AI-assisted), SQL, Git, Cloudflare Workers/D1

## EDUCATION

---

**Master of Science in Information Management** | University of Washington

Sep 2025 - Jun 2027 (Expected)

*Specialization: Business Intelligence and Data Science*

**Bachelor of Science in Management Information Systems** | University of Delaware

Sep 2021 - Jun 2025

*Minor: Business Analytics*

## PRODUCT & AI PROJECTS

---

**AgentDeck** | Personal AI product

Jun 2026 - Present

- Brought AI coding CLIs and APIs **into one desktop app**, defined and built with AI coding agents, with an orchestrator agent assigning work to parallel worker agents.
- **Kept agent work going** in personal use past account usage limits by designing automatic failover for the orchestrator agent between Claude accounts and a Codex fallback.
- **Stopped premature prompt submission** to the orchestrator agent by setting a human-in-the-loop rule requiring the user to press Enter before sending typed input.

**Fuqing Inventory System** | Freelance Product Developer, family building-materials business | Seattle, WA Aug 2026 - Present

- Shipped an AI-built web inventory system **now in daily use**, replacing the store's manual stock and credit-sale records.
- Moved **about 97% of order entry** to an AI assistant converting the store's daily Excel sales sheets into orders in a largely fixed format, with rule-based validation before writing.
- Proposed checking AI-imported orders against source sheets and approved the fix that **corrected 118 mis-booked orders**, including discounts recorded as payments.

**AI Resume Tailor** | Personal LLM pipeline with blind AI review

Oct 2026 - Present

- Defined an **LLM resume pipeline** that writes from a confirmed fact bank and uses another vendor's model for blind recruiter review and fact auditing.
- Defined **code-based quality checks** on resume facts, layout and wording before the pipeline's independent model reviews.

**ClassBrief** | Personal AI pre-class briefing workflow

Oct 2026 - Present

- Delivered **9 pre-class briefs** for 2 graduate courses by defining an AI workflow that converts Canvas readings into source-linked preparation materials with upcoming deadlines.
- Specified a **writer-reviewer loop** that checks course dates and required readings against Canvas, rewriting failed briefs before delivery to course Drive folders.

## INTERNSHIP EXPERIENCE

---

**AI Data Intern** | Shanghai Yuepu Network Technology | Shanghai, China

May 2025 - Aug 2025

- Gave the paid-traffic team **structured JSON analysis** for campaign close-out reports by configuring a Dify LLM workflow with the manager's ad-cover prompt.
- Delivered ad buyers a DingTalk budget alert **still in use** after the internship, built end to end in AI-assisted Python to check live project budgets through Xiaohongshu's ad API.
- Mapped database fields for a co-built, AI-assisted Python report workflow that cut preparation time per report by an **estimated 80% or more**.
- Designed an **Axure RP ledger prototype** for the internal office system, revised its button layout and search after manager review and handed it to the tech team.

**AI Product Intern** | Shanghai Suanliyou Technology | Shanghai, China

Jan 2024 - Feb 2024

- Reproduced AI tutorial workflows and turned them into step-by-step **screenshot guides** for prospective customers trying the company's AI platform.
